

Tölt by Michael Young

year of creation / 2002

The Tölt line, created by Michael Young, is a feast for the eyes. Its table legs pay homage to the design of the seventies and eighties, while the perforated table tops are more organic in form. The unexpected combination of a 'classical' material, (Robinia wood) with a 'high tech material' (Corian) gives Tölt its undefineable character, making it a bold and timely statement for the here and now.
